# Objectives and Content

# Objectives and Content

Lens Simulator provides supporting information during the conversation with customers to present and explain the main benefits and features of sun and clear lenses.

The application design suggests a path to follow during the conversation, from the selection of a lens to all the features that enhance its performance. It can also be navigated autonomously, moving across modules according to your needs.

# Objectives

- 1 To visually explain lens technologies and treatments in an interactive and engaging way.
- 2 To show differences between lens characteristics in order to improve value perception and reduce returns.
- 3 To give access to branded applications from a single entry point to allow smooth transitions during the conversation.

# App Setup and Settings

## First Access and Login

1. Click on the search bar

A search bar allows you to look for your store

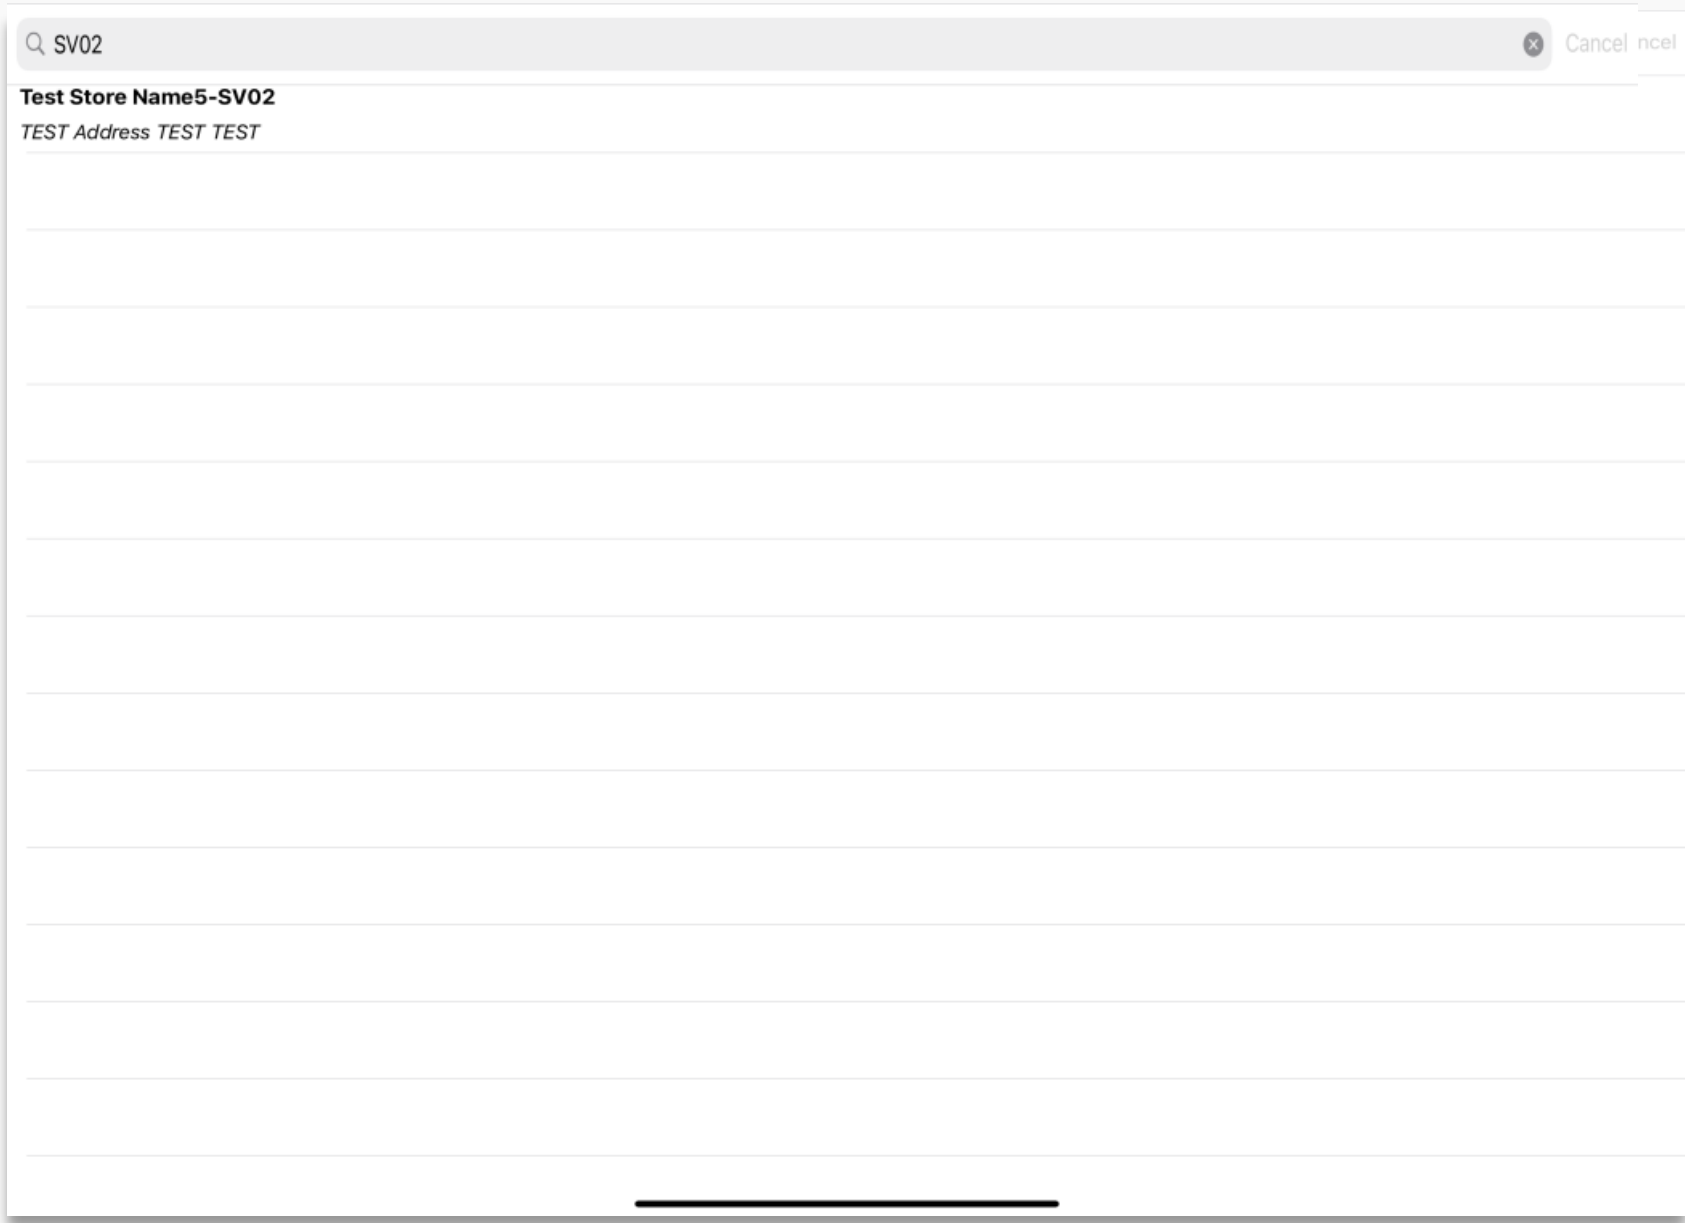

A blank page appears at first access after downloading and installing the application.

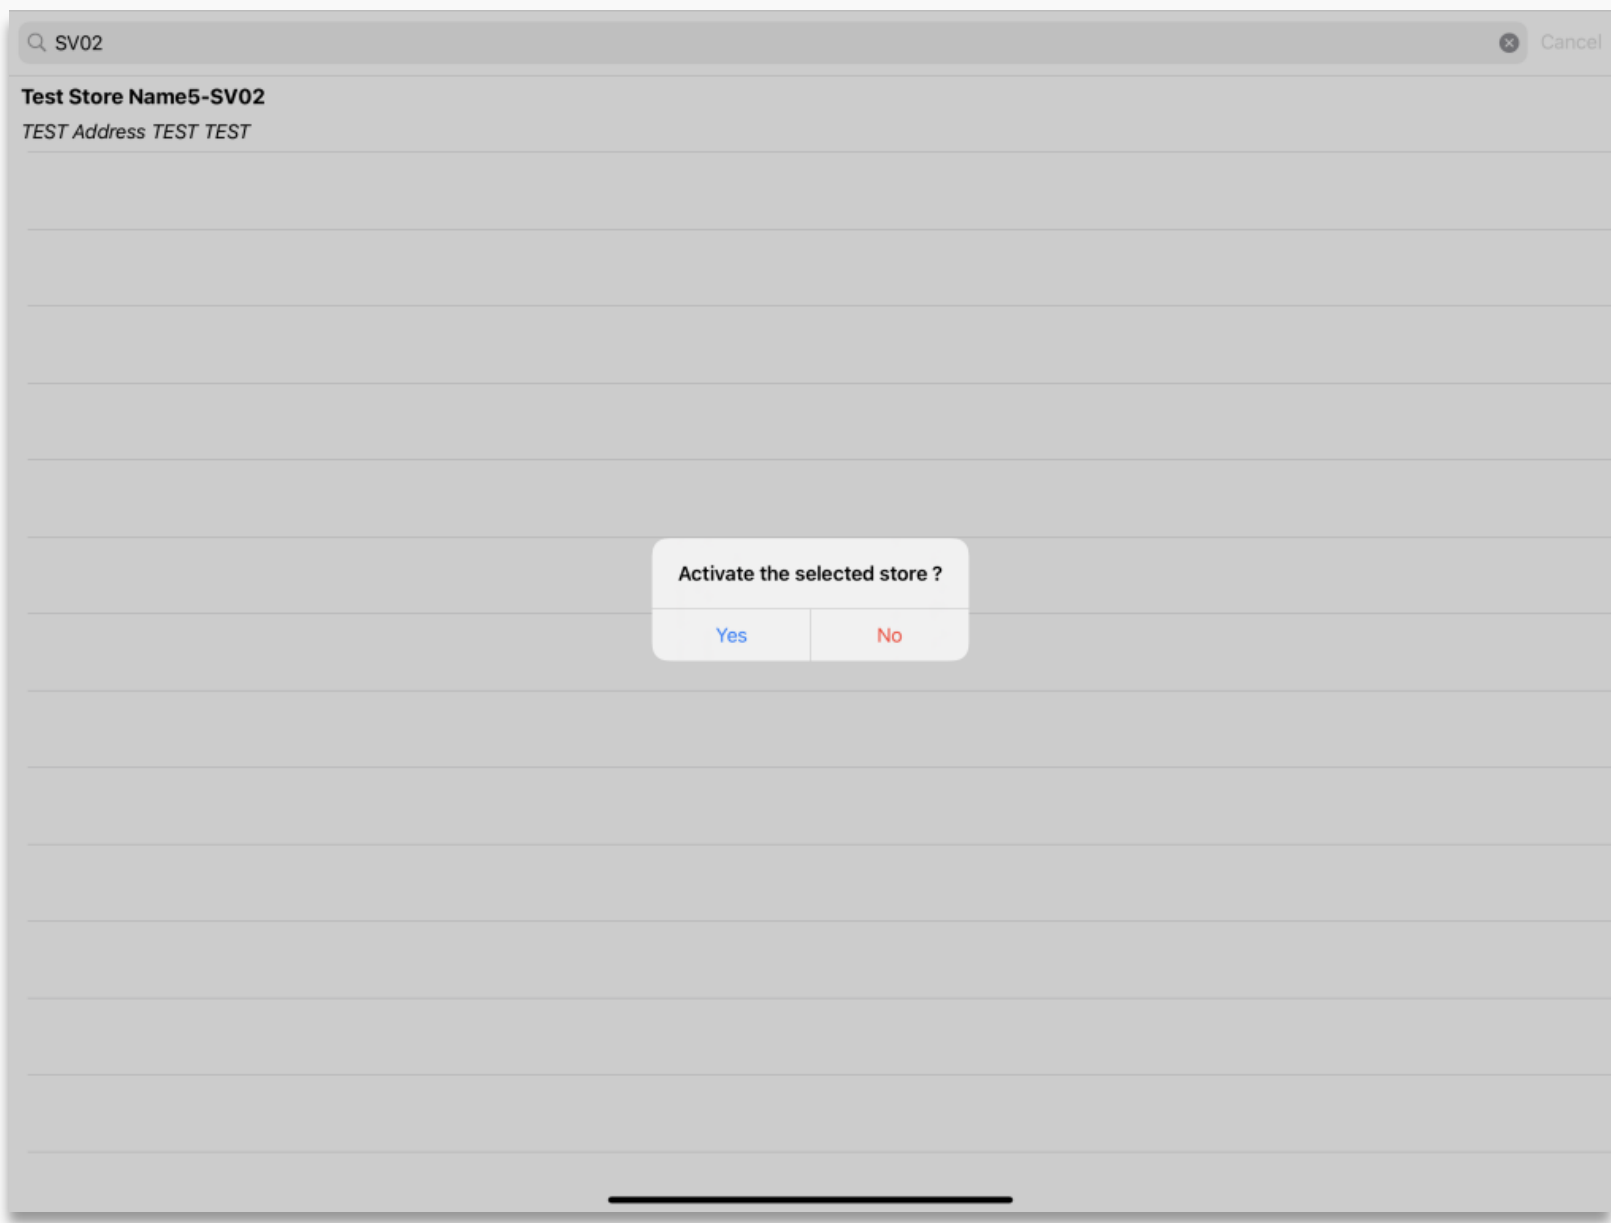

Clicking on the search bar will bring up a notepad.  
Type your store code and then click on the search button to look for your store.

# App Setup and Settings

First Access and Login  
2. Search your store

A drop menu appears showing the store associated with the specific store code.

Choose your store from the drop-down menu by clicking on it. Then proceed with the confirmation to activate the store.

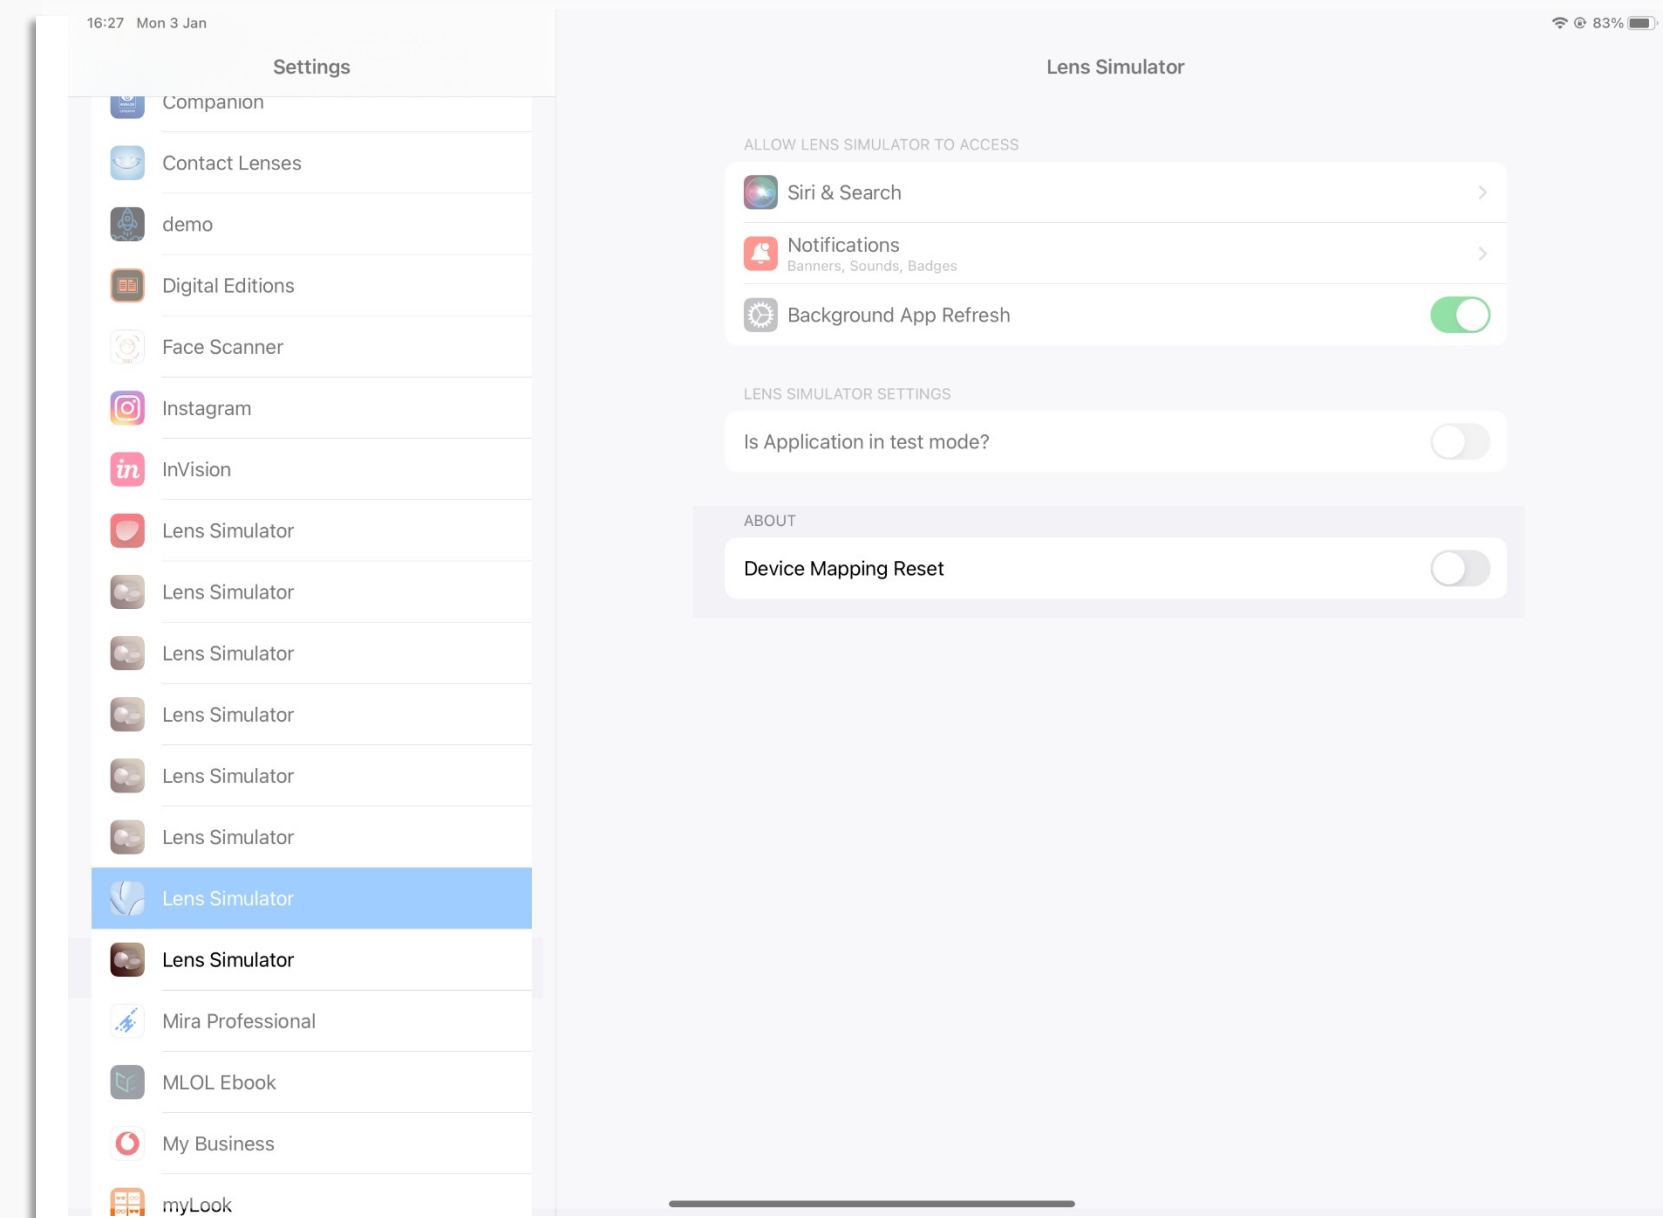

# App Setup and Settings

Reset Store

Open the iPad settings  
by clicking on the icon in the homepage.

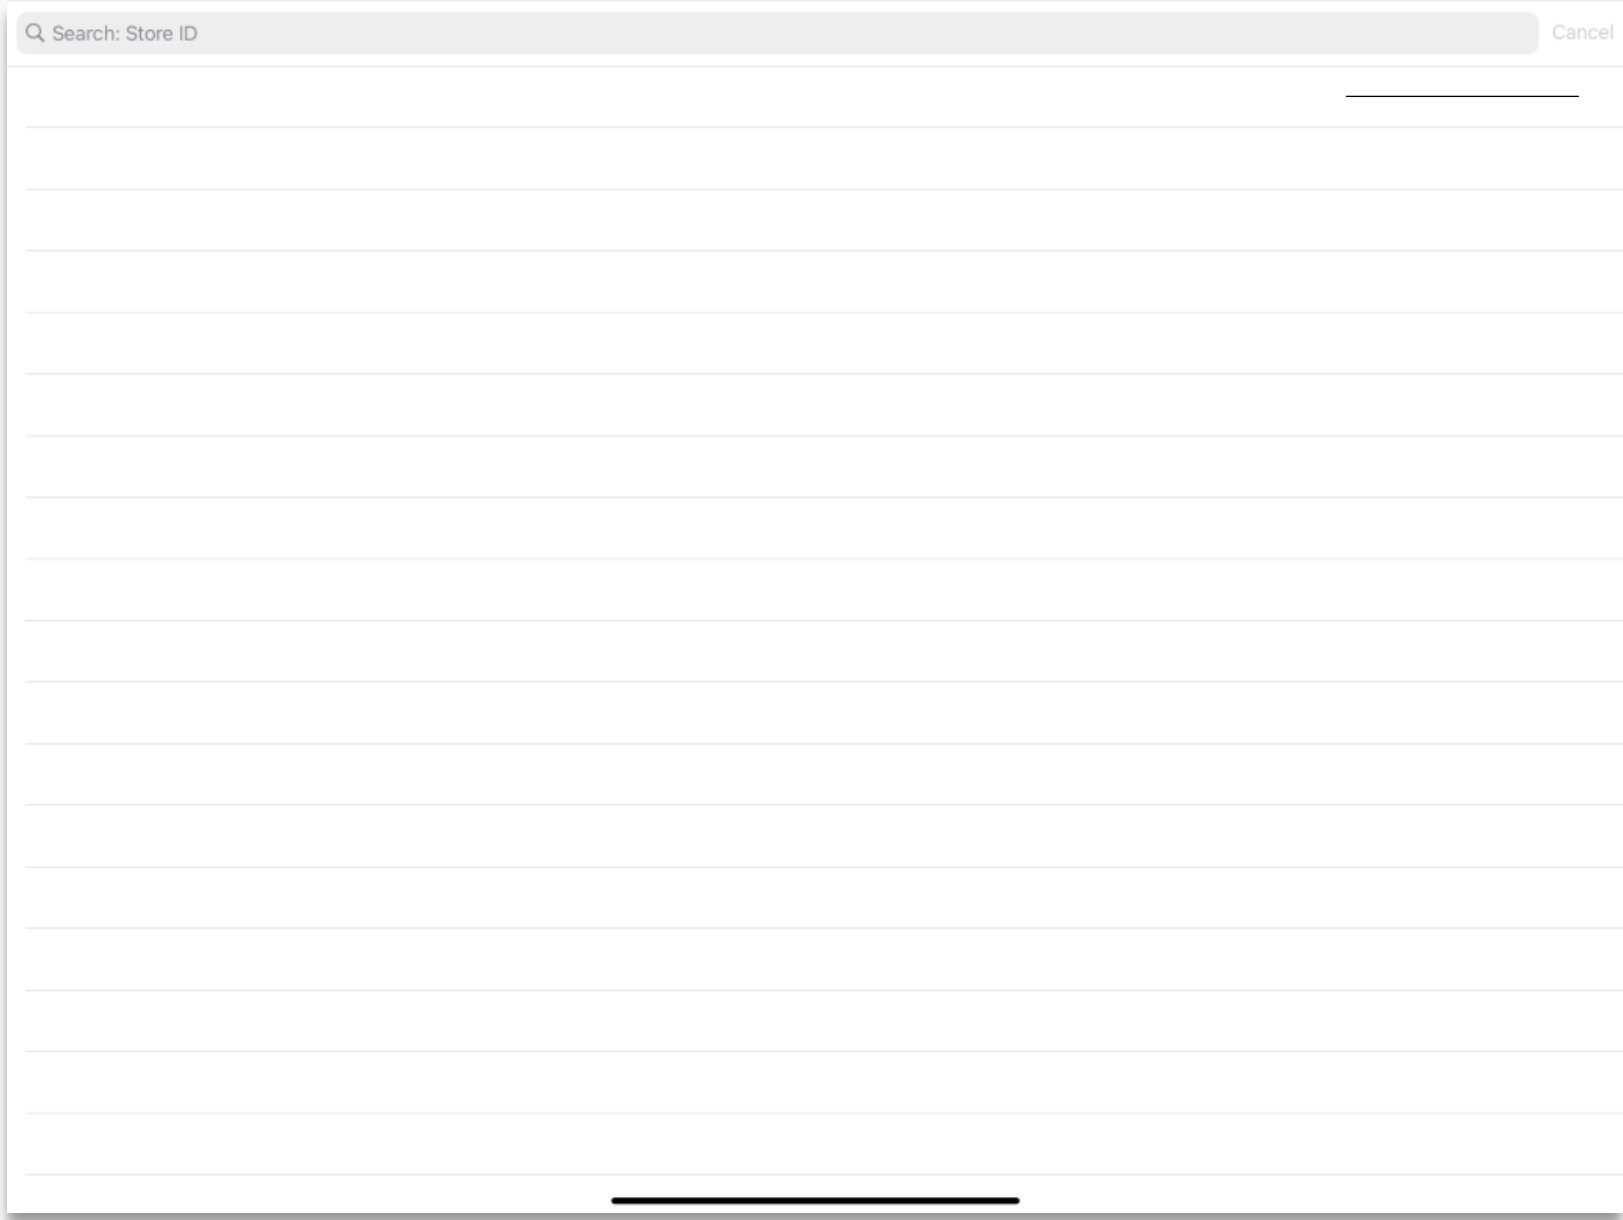

Select Lens Simulator from the list of applications available.  
Then slide the **Device Mapping Reset** button to the right.

# App Setup and Settings

Reset Store

Swipe up from the bottom-left corner of the screen.  
Close the app by swiping up on the app's preview.

Reopen the application  
and proceed with a new login.

# App Setup and Settings

Content Downloading

Access these areas only when the download is complete

Check the progress of the content download here – when the progress bar reaches 100% or disappears, the download is complete

Insert filters to personalize navigation

The screenshot displays the Sun RX Lens Colors application interface. At the top, a blue button labeled "General assortment" is visible. Below it, a prompt reads "SELECT 1 TO 3 PREFERENCES AND THEN TRY THE EXPERIENCE". The main area features a grid of 15 lens color samples, each with a heart icon for selection. The samples are categorized as follows:

- Row 1: BLACK LEVEL 1 solid, BLACK LEVEL 2 solid, BLACK LEVEL 3 solid, BLACK LEVEL 4 solid, BLACK LEVEL 1 gradient
- Row 2: BLACK LEVEL 2 gradient, BLACK LEVEL 3 gradient, BLACK LEVEL 4 gradient, GREY POLAR MIRROR SILVER mirror, GREY 85 MIRROR SILVER mirror
- Row 3: GREY LEVEL 1 solid, GREY LEVEL 2 solid, GREY 75 solid, GREY LEVEL 4 solid, GREY LEVEL 1 gradient

On the right side, there is a vertical slider labeled "EXTERNAL VIEW" and "INTERNAL VIEW" with a "FILTER" button below it. A filter overlay is open on the right, showing a "Categories" dropdown and a "Colors" section with a grid of color swatches. The swatches include various shades of grey, blue, green, and brown. At the bottom of the filter overlay are "Reset" and "Done" buttons.

Shortcut color selection

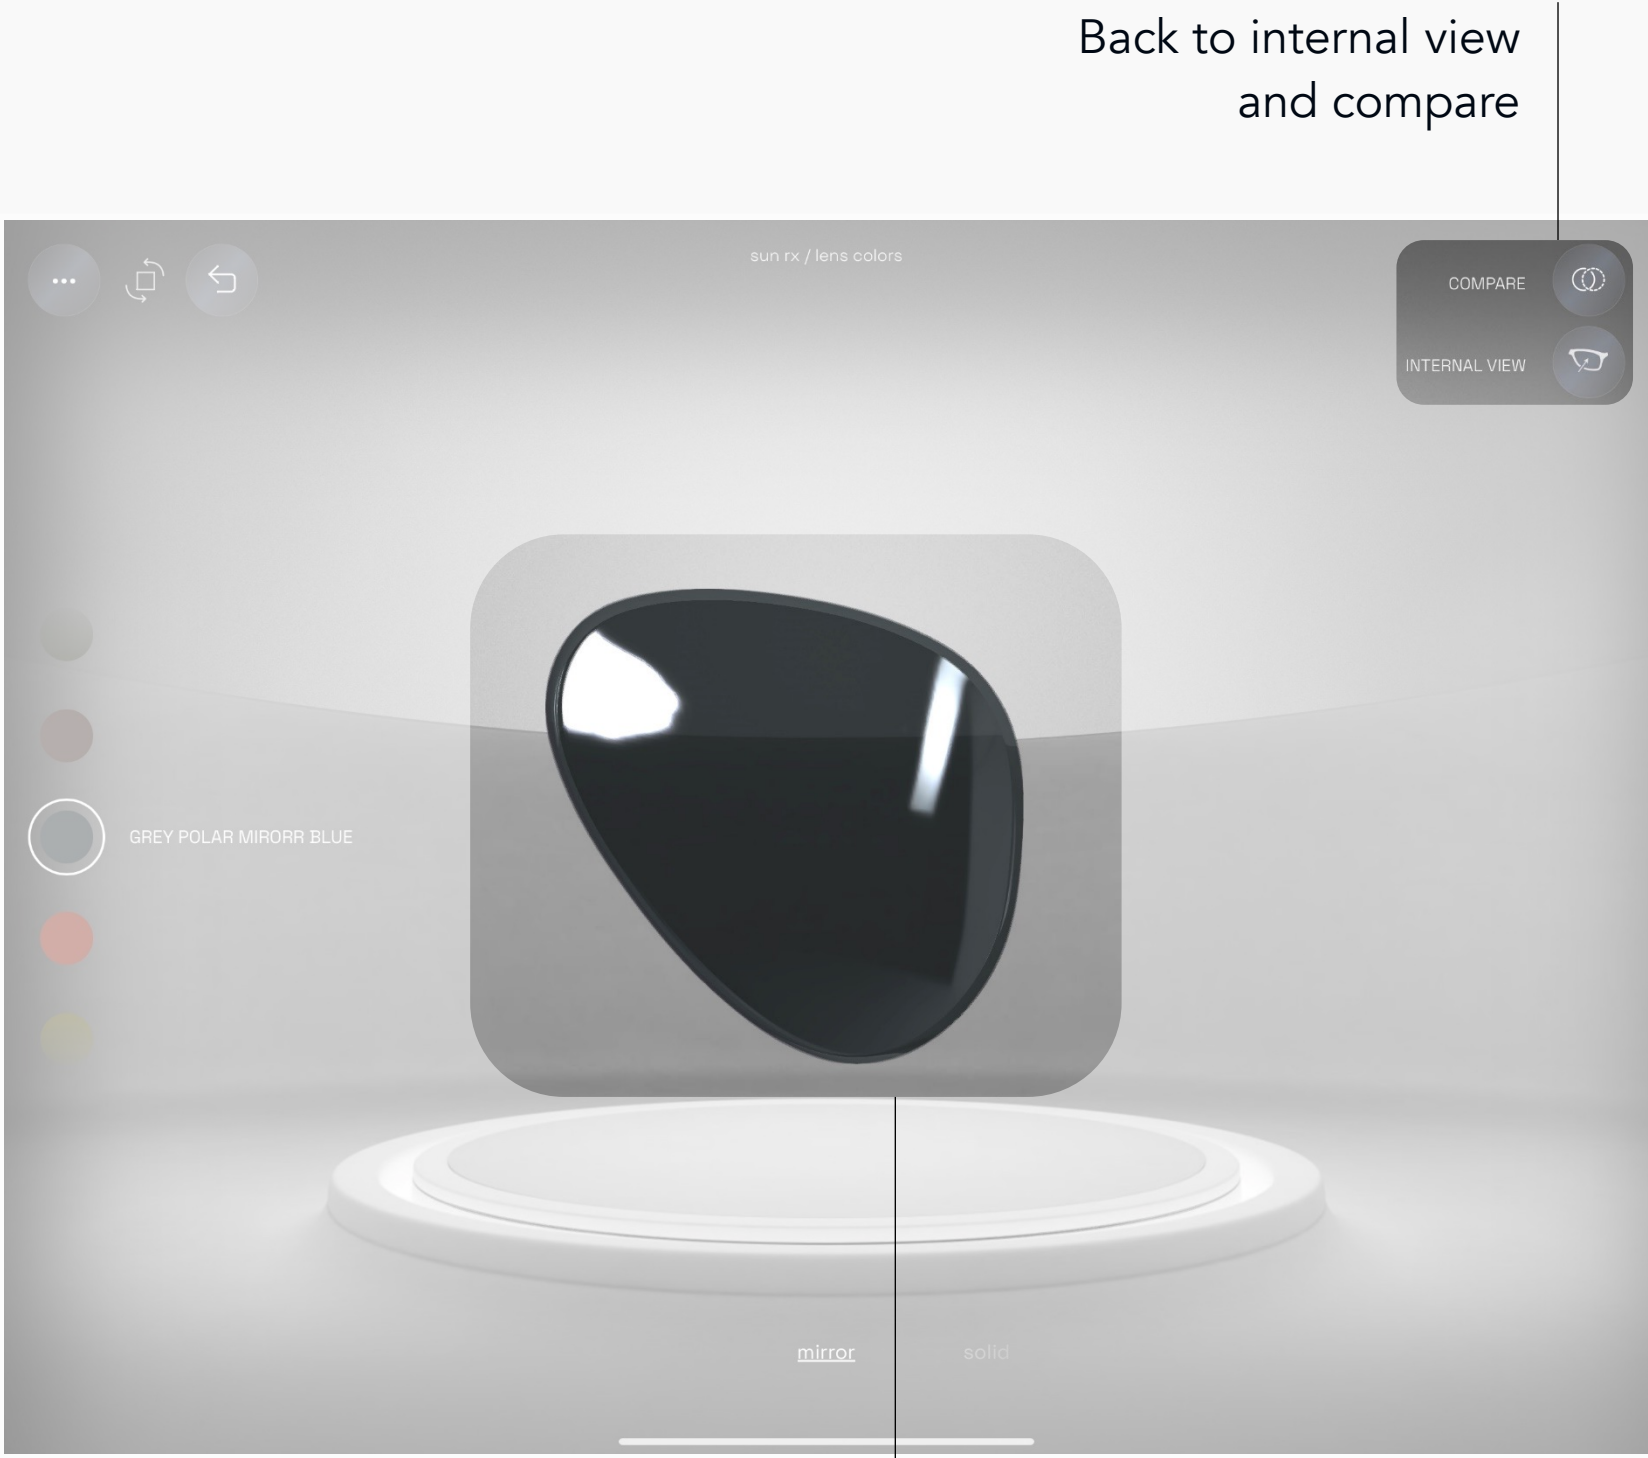

The Lens Colors section provides digital samples to showcase available lens bases and see-through simulations for each color.

Select category

Tap and move the lens to experience the effect

Tap and flip the lens

# Selling Tips

# Selling Tips

## IN STORE A CUSTOMER ASKS...

I think Transitions® lenses would be perfect for my lifestyle, but I'd like to know what they look like when worn! What's their color in half-light conditions?

I can show you the whole gradient of shades. Here's a simulation of how they would look moving from dark to bright conditions!

You can also experience the effect by scanning the QR code and virtually trying on the lenses!

## IN STORE A CUSTOMER ASKS...

I have started to having difficulties seeing up close, but changing glasses is too inconvenient for me.  
A friend of mine swears by progressive lenses, and I'd like to know more!

That's exactly what you need! PG lenses allow you to have the best vision experience at different distances by only wearing a pair of glasses.

Look, let me show you how they work!  
You'll never have to switch glasses and carry multiple pairs.

# Selling Tips

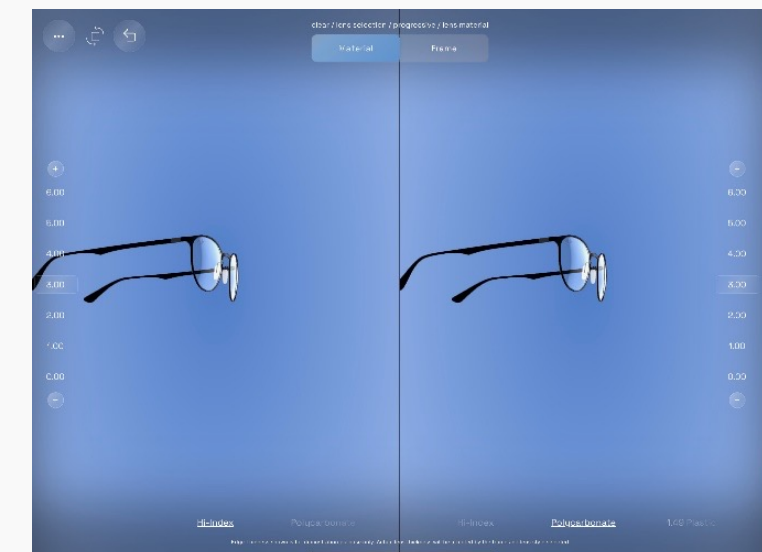

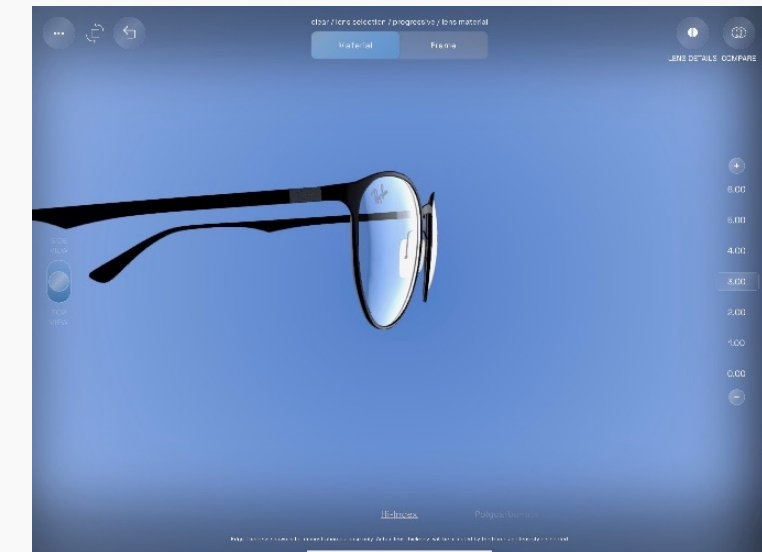

## IN STORE A CUSTOMER ASKS...

I love this style, but I'm concerned about how my glasses will look because I have a strong prescription.

I understand your concern; we have a variety of lens materials that can support your prescription and guarantee the best final look!

Here I can simulate what your glasses would look like! You can also compare different lens options.

## IN APP

# Selling Tips

## IN STORE A CUSTOMER ASKS...

My glasses tend to get dirty and it's hard to clean them. Is there anything that can help me keep them clean?

That can be so tiresome! The most effective solution is adding an antireflective coating with oil-repellent and antistatic treatments.

These specific treatments limit the buildup of residue on the lens surface while still allowing for simple and long-lasting cleaning.  
You'll see the difference!

# Q&A

- 1 What does Lens Simulator do?**  
The Lens Simulator app aims at supporting storytelling about all the features and benefits of prescription lenses through dynamic and interactive content.
- 2 What can the app be leveraged for?**  
Improved storytelling to drive conversion and trigger up-selling.
- 3 When should I use this app in the purchasing process?**  
During the Lens selection phase for complete pairs and when selecting frames for sun purchases.
- 4 Should the experience with Lens Simulator be assisted?**  
Yes, the app should only be used with the sales associate guiding the consumer journey.
- 5 What is the simulation reliability of the app?**  
Simulations aim at closely mirroring reality, but they are for demonstrative purposes. They might differ from final results due to technological constraints.
- 6 Does Lens Simulator suggest specific products to be purchased by the consumer?**  
No, the aim of the app is just to educate about lenses, not to give specific product suggestions.
- 7 How am I supposed to end the experience with Ray-Ban App?**  
You could show some examples of physical products featuring the specific lens technology (sun experience) or configure lenses leveraging the knowledge acquired during the experience (complete pair).

- 1 What version of iOS is needed for the iPad to be eligible for the app?**  
The minimum version is iOS 11.4.
- 2 What iPad version is needed for the iPad to be eligible for the app?**  
It's recommended to use the app on 2<sup>nd</sup> generation devices.
- 3 Can the app be accessed via desktop or smartphone?**  
No, the application is available only for iPads.
- 4 Is the internet connectivity needed for the app to work?**  
It's required only when downloading the app for the first time.
- 5 Are there any analytics installed in the app?**  
Yes, only to register # of sessions and most viewed pages.
