Lens Colors

Costa lenses were made with changing light conditions in mind. To get the most out of Costa lenses, it's important to choose the right color. At TeamVision, we offer six lens colors that range from variable light to extremely bright light with blinding glare. Mirror lenses reflect the light away from the eye and enhance visual acuity.

Lens Color Selection		Best for
	<p>Blue Mirror Best for bright, full-sun situations on the open water and offshore.</p>	<p>Boating and fishing in deep water Open reflective water Harsh sun</p>
	<p>Green Mirror Enhanced vision and contrast for fishing inshore and on flats.</p>	<p>Sight fishing in full sun High contrast</p>
	<p>Gray Silver Mirror A good everyday choice for activities on the water and land.</p>	<p>Everyday activities Overcast days Reduces glare, especially off water</p>
	<p>Copper Silver Mirror Well-suited for stream fishing and other environments with varying light.</p>	<p>Excellent for sight fishing Everyday activities/ Most versatile Cloudy days</p>
	<p>Gray Mirror A good everyday choice for activities on the water and land.</p>	<p>All-around activities Natural contrast</p>
	<p>Copper Cuts glare for eye comfort in a variety of situations, from sight fishing to driving.</p>	<p>Excellent for sight fishing Everyday activities/ Most versatile Cloudy days</p>
