

Trifocal lenses provide distance, fixed intermediate (computer) and fixed near vision (reading).

Within the TeamVision assortment you will have the standard 7 x 28 lens that has an intermediate portion that is 7 mm in height and width of 28 mm.

We offer clear and sun 7 x 28 Trifocal lenses in plastic, polycarbonate with and without Anti-Reflective.

Prescription Entry in Ciao! Optical

Source	Internal Rx	Sphere	Cylinder	Axis
	SAFERSTEIN, MITCHELL	OD(R) +1.00		
		OS(L) +1.00		
Prescription Type	Trifocal	Add 1	Add 2	
Date Written	MM/DD/YYYY	OD(R) +2.00	+1.00	
Expiration Date	MM/DD/YYYY	OS(L) +2.00	+1.00	

- **Add 1 and Add 2 are required**
- Add 2 should be 50% off Add 1
- For example, +2.25 Add 1 would have a +1.12 Add 2 and could go to RxO for manufacturing

<input checked="" type="radio"/> Clear	<input type="radio"/> Sun	<input type="radio"/> Photo
Vision Type	TriFocal	
Lens Design	7x28	
Material	1.59 Polycarbonate	
Style	1.50 Plastic	
Color	1.59 Polycarbonate	

- You must select Tri Rx option when entering in the Rx to select these lenses.

Note:

- Any non-standard trifocal (where Add 2 is not 50% or 1/2 of Add 1), use CustomEyes vs. RxO. RxO will only make trifocal where Add 2 is ½ of Add 1.
- On site lab tickets, only the Add 1 power (full reading/near) will print.
- Do not use the same value for Add 1/Add 2 – that job may be cancelled and/or delayed.
