

# CLEANING CHEMICALS

## Aerosol Disposal

Cleaning materials are an important part of what is needed to run our business. As a reminder, you should only be **ordering approved chemical cleaners** through the official EssilorLuxottica procurement platforms of **Central Procurement (CP)** or **Office Depot**.

### Ordering only from approved platforms:

1. Keeps operational costs down, as we have negotiated lower costs through bulk buying for many items.
2. Allows ordering of environmentally friendly versions, when possible, as Procurement vets all products for the best option.
3. Ensures access to Safety Data Sheets (SDS), as these items are available in the EssilorLuxottica Velocity eBinder.

### AEROSOLS

**Aerosols of any kind are considered hazardous waste under EPA regulations.** This includes aerosol cleaning products which, even when used and "empty", require special disposal.

To eliminate the potentially complex and expensive programming required to properly manage aerosols for disposal, EssilorLuxottica does not offer aerosol cleaning products from our Procurement platforms.

We offer non-aerosol versions of those products that previously were aerosols. The table provided below outlines cleaning products by application that are available in CP.

Article #	Product Use	Product (Non-Aerosol)
3041941	Window/Glass Cleaner	Windex
3043189	Surfaces/Wood Cleaner	Old English Lemon Oil Furniture Polish
3029228	Stainless Steel Cleaner	Weiman Steel Cleaner
3051538	Surface Disinfect	Lysol All Purpose
3043194	Toilet Cleaner	Toilet Bowl Cleaner

- Continue to use any aerosols currently at your location until they are empty
- Request a hazardous waste pickup through the Maintenance Portal for disposal of used aerosol containers
- **Only purchase non-aerosols going forward**

If you have aerosols in your site that you need assistance with disposal, or have any questions, please contact [RetailSafety@LuxotticaRetail.com](mailto:RetailSafety@LuxotticaRetail.com).
